The following substances may be present above a concentration of 0.1%(w/w) in the individual articles of this vehicle. The information on SVHCs is based on the material data sheet (MDS) submitted by our partners via CAMDS (<https://www.camds.org.cn/>).

Each vehicle delivered by NIO to users comes with a user manual, which includes safe use information for car users/drivers/owners, repair and maintenance information for vehicles and genuine parts, and safe use information for service personnel, etc. Please use the car and its parts according to the user manual, and repair, maintain the vehicle in accordance with the technical instructions and industry standards of the relevant activities. For the safe use of special parts (such as battery packs, batteries, etc.), please refer to their MSDS. If the user has any question, please contact your NIO fellow.

The articles with the SVHCs below should minimize potential exposure to people and the environment. An end-of-life vehicle may only be disposed legally in the European Union at an Authorized Treatment Facility (ATF). Vehicle parts should be disposed in accordance with locally applicable laws and local authority guidance.
